WHY THIS REQUEST IS A DIVINE REQUEST

There is an invisible world that lives by not writeable words, I happen to be the Arctic Magnetic Earth Naturalist confused with Amen a biblical person – disadvantage is that I am aware form time to time of large problems and things to come such as floods, hurricanes, wars less often fires, as the path of events can be predicted if granted to be written. The Son of God to come as many believe is what I refer to a **System of Nature** of our **Galaxy** not a person on a throne. The planet's system of nature, life, death - communicates with us humans and all other biological and geological forms constantly and magnetically directs the light to create life just as humans can set a bucket on the yard before it rains to collect water – God and Earth are controlled by very small but quickly connecting omni-intelligent invisible magnetic force faster than light and stronger than any matter known to humans.

There are many problems on the earth according to the earth – the Son of God - that were causes by governments and religions – human groups wrongdoings. I am a founder and president of Eugenix P.S.A. a simple shares corporation dedicated to Arcticus Blancus – indigenous polar hair climate tribal group with plan to save my group. However, I have been also tasked to promote Earth's will to save biologic diversity, geologic diversity, human diversity from present catastrophes and genocides that earth blames on the governments. - Why me, well probably because I have what it takes to clarify God's Earth word that has been misunderstood for thousands of years.

Many things happen in front of my eyes, and I have a reason to believe that many things are to happen very soon if no actions are taken that were brought to the attention of the government by the invisible realm through my words.

Hurricane Helene, September 24-29: 219+ deaths, $79.6 billion

On 17.09.2024 as a part of my resignation letter from my job in AT&T I had given them a warning that I was permitted to give, I wrote to them*: "I hope that AT&T is well prepared for the coming weather events that will continue to get worse until the coming of son of man."*

https://www.climate.gov/news-features/blogs/beyond-data/2024-active-year-us-billion-dollar-weather-and-climate-disasters

KRZYSZTOF IRENEUSZ PAWLAK
EMAIL@EUGENIX.ORG
+48 519-521-520

Storm Boris, September 12-16: 335+ deaths, €18 billion

On 28.08.2024 I was asked to try to get attention of the Wawel Cathedral Church, by helping them prepare for flood so I wrote to the Cathedral Representative: *"God demands the protection of all people of the world as separate climatic tribes, because these are the only divisions God recognizes. Can you stop water without a vases? I dislike this situation just as much as you do."* https://climate.copernicus.eu/esotc/2024/flooding

God can divert upcoming catastrophes to places uninhabited only if Arcticus Blancus and other light hair climate ethnic individuals and groups are helped by the United States of America and Republic of Canada – preferably via cooperation with Eugenix P.S.A.

I was asked by very unpleasant authority from the invisible realm to ask human governments to agree and ratify either one or both of the United Nations indigenous rights laws that would allow the Arcticus Blancus polar hair group and individuals and it would allow other light hair indigenous groups and individuals to return to any place of symbiosed indigenous climate and symbiosed indigenous community of same natural biological physical characteristics that are protected only in symbiosed climatic ecosystem - that helps those persons to sustain their natural heritage thru own indigenous intimacy and relationships.

Reunion of polar hair and other light hair indigenous groups and individuals should be achieved in the state of Alaska of the United States of America and in the state of Canada of the Kingdom of Great Britain - Agreement to either or both UN indigenous rights laws will allow polar hair indigenous persons and other light hair indigenous persons to come back to hair climate and ecosystems in accordance with provisions set in UN ILO C/169 - Convention on the Indigenous and Tribal Peoples and UN A/RES/61/295 - Declaration on the Rights of Indigenous Peoples.

If this is not achieved the invisible realm of forces will begin to destroy simultaneously states that hold polar and light hair captive and states that prevent polar and light hair from entering light hair climate. I am fairly warning your governance as I warned the other governances.

This is a divine intervention. I am speechless as well.

REQUEST TO RATIFY UN INDIGENOUS RIGHTS FOR LIGHT HAIR INDIGENOUS PERSONS

Dear Presidents, Prime Ministers, Governors, Kings and Queens,

I respectfully appeal to your governments to **ratify, adopt, or fully implement** the two principal international instruments protecting Indigenous Peoples worldwide:

- **ILO Convention No. 169 (Indigenous and Tribal Peoples Convention, 1989)**
- **UN General Assembly Resolution A/RES/61/295 (United Nations Declaration on the Rights of Indigenous Peoples, 2007)**

Together, these instruments form the strongest global framework for safeguarding Indigenous identity, cultural continuity, territorial rights, and climate-appropriate habitation. Your state—each with long histories of constitutional governance, human rights commitments, and Arctic or sub-Arctic stewardship—are uniquely positioned to demonstrate global leadership by ensuring that Indigenous Peoples whose heritage is tied to polar and sub-polar climates may live, develop, and preserve their identity within the environments that shaped them.

1. International Obligations and the Rights of Climate-Specific Indigenous Peoples

ILO Convention C169 remains the world's only binding treaty specifically addressing Indigenous and tribal peoples. It affirms all widely present rights in the less developed countries inhabited mainly by the native mono-indigenous groups:

- the right to maintain and strengthen cultural identity;
- the right to consultation and participation in decision-making;
- the right to lands, territories, and resources traditionally occupied;
- the right to determine development priorities;
- the right to preserve institutions, customs, and ways of life.

KRZYSZTOF IRENEUSZ PAWLAK
EMAIL@EUGENIX.ORG
+48 519-521-520

UN A/RES/61/295 (UNDRIP) further reinforces these rights, including:

- **Article 3** – the right to self-determination;
- **Article 8** – protection from forced assimilation or destruction of culture;
- **Article 10** – protection from forced removal from lands;
- **Article 25–29** – rights to maintain spiritual, cultural, and environmental relationships with traditional territories;
- **Article 36** – rights of Indigenous Peoples divided by borders to maintain cross-border relations.

These provisions directly support Indigenous groups whose cultural and biological heritage is tied to **polar and sub-polar climates**, including the **Arcticus Blancus** and related climate-adapted sub-polar groups.

2. Request for Recognition of Climate-Appropriate Relocation Rights

On own behalf and for the **Arcticus Blancus r**epresented by **Eugenix P.S.A.**, in accordance with **United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP, A/RES/61/295)** explicitly guarantees that Indigenous individuals may be represented by their chosen representatives, including when they are absent, displaced, or unable to appear. This is grounded in Articles **18, 19, 33, and 36**. I respectfully request that your governments:

1. **Recognize the right** of Arcticus Blancus individuals and families to return to their traditional polar climate zones, specifically the northern regions of Alaska and Canada above approximately 62.75° N, consistent with UNDRIP Articles 10, 26, and 36.
2. **Recognize the right** of other light-hair sub-polar Indigenous or semi-Indigenous groups to return to sub-polar climates, including southern Alaska, the broader Canadian territories, and the northern United States, in accordance with their historical, cultural, and ecological adaptation.
3. **Permit the establishment** of Indigenous and Semi-Indigenous Reservations or Cultural Territories where these groups may preserve their identity, heritage, and climate-specific traditions without risk of cultural erosion or displacement.

4. **Engage in formal consultation** procedures, as required by ILO C169, with representatives of the Arcticus Blancus and related groups to determine appropriate pathways for relocation, recognition, and long-term cultural protection.

3. Benefits of Ratification and Implementation

Ratifying or fully implementing these instruments will:

- **Strengthen your countries' positions** as global leaders in Indigenous rights and Arctic stewardship.
- **Demonstrate solidarity** with Indigenous communities worldwide, including those of the Pacific, the Americas, and the circumpolar regions.
- **Support climate-appropriate habitation** for groups whose cultural and biological heritage is endangered by displacement into unsuitable environments.
- **Enable consultation** that is structured, lawful, and transparent and proceeds with respect to all indigenous persons and other stakeholders.
- **Contribute to the prevention** of cultural extinction and the preservation of human diversity in accordance with UN principles.

4. Current Efforts and International Cooperation

The Arcticus Blancus community is already engaged in dialogue with states that have ratified ILO C169, including **Germany, Norway, Denmark and Poland** regarding relocation rights and cultural protection and had prepared letters to the Republic of Iceland, Finland, Kingdom of Sweden and Russian Federation.

However, because the indigenous persons and groups of polar hair and other light hair that are currently citizens of many South American and Central American states, whose ancestral climate zones lie within Alaska and northern Canada that are closer and easier to reach than Norway and Denmark for thousands of polar hair Arcticus Blancus indigenous persons and tens of thousands of other light hair person cooperation with your governments of Alaska and Canada are essential to prevent irreversible cultural loss.

5. Closing Appeal

On behalf of all Indigenous Peoples whose rights are protected by these instruments, I respectfully request that your governments:

- **Initiate or accelerate the ratification process** for ILO C169;
- **Affirm full implementation of UNDRIP** within national and state legal systems;
- **Establish formal consultation mechanisms** with Arcticus Blancus representatives;
- **Support climate-appropriate relocation and cultural preservation initiatives** in the Arctic and sub-Arctic regions.

Ratification and implementation of these frameworks represent not only a legal obligation but a profound commitment to human dignity, cultural survival, and the protection of the world's most climate-adapted Indigenous heritages.

With respect and gratitude for your consideration from the Arcticus Blancus Indigenous Community and soon more evident forces of Earth and God.
